

CHEMIST HOTLIST**286620 – Formulation Scientist**

- Masters in Pharmaceuticals and Bachelor's in Biology
- 3 years' experience working in a GMP laboratory
- 2 years' experience validating equipment and writing SOP's
- 2 years' experience working with vendors and training employees on new equipment
- 2 years' experience managing and formulating new products and systems
- 1 year experience performing analytical tests in a cosmetics laboratory
- Familiar with FDA and cGMP practices

277019 – R&D Chemist

- Bachelors of Science in Chemistry and minor in mathematics
- 3+ years' experience working with the analysis and testing of coatings and lubricants
- 3+ years' experience working specifically with UV-curable coatings
- 3+ years' experience with the formulation of lubricants and solving problems to minimize downtime
- Experience with customer specifications and analytical techniques

269141 – Senior Associate, Chemist

- Bachelors in Chemistry along with 4 years of experience.
- 4 years' experience with the formulation of new products for fragrances, oils, gels and waxes
- 4 years' experience working in a quality assurance laboratory
- 4 years' experience with product development
- Specifically the breakdown of components and re-formulating of products to meet new standards and qualifications

283258 – R&D Data / Formulator Scientist

- Master's degree in Chemical Engineering
- 6 years' experience working in a GMP regulated laboratory
- 6 years' experience providing technical support-including SOP review
- 6 years' experience implementing new systems and transferring data
- 1 year experience formulating products in the lipstick department
- 1 year experience performing tests and emulsions on cosmetic products

289975 – Physical Chemist

- PhD in Physical Chemistry along with eleven years' experience of technical management in personal care industry
- 11 years' experience in product launch from research to full lifecycle of new products
- 11 years' experience with the formulation of products: creams, body washes, shampoos, etc.
- 11 years' experience managing the R&D team, including 3 direct reports
- Overall very comfortable with all aspect of new personal items
