

Engineering Hotlist**169418 - Sr. Engineering Product Development Manager**

- Purdue undergrad in Engineering with MBA.
- Manage design/development teams. Full budgetary oversight.
- DVP&R Test Plans, DFA. APQP, DFSS with Solidworks.
- Consumer Products, Automotive, Aerospace, Industrial equipment background.

277349 - Electrical Product Engineer

- Purdue undergrad in Electrical and Computer Engineering Technology
- Design of future products and continuous improvements; specialty vehicle and luxury diesel motorhomes.
- Electrical system layouts and modifications in Solidworks, Inventor and AutoCAD.

276964 - Process Safety Engineer

- Purdue undergrad, Chemical Engineering, Highest Distinction. PE.
- Industrial hygiene and process safety improvements – chemical manufacturing.
- Strong PSM background – flammable, reactive, and toxic chemicals.
- Plant start-up, batch operations support; OSHA VPP and RMP enforcement.

130299 - Mechanical Design Engineer

- Mechanical Engineering Undergrad with MBA
- Mechanical design of power generation equipment. Used 2d/3D (Solidworks, Inventor, AutoCAD).
- Tooling background.
- Redesign changes for innovative tooling to increase production and quality.
- Strong Geometric Dimensioning and Tolerance (GD&T) knowledge.

276688 - Manufacturing Engineering Manager / Program Manager

- Purdue Industrial Technology undergrad. Diverse background in sales and manufacturing.
- Project engineering ~ Manufacturing Engineering program launch low to mid volume specialty vehicles. Management background up to 8 Engineers. Implemented process tooling req.
- Managing inside sales function, focus on process improvement and optimization.
- Translates customer requirements into engineering specification and concept drawings.
