

Quality Hotlist**Quality Assurance Engineer – 266435**

\$110K

- Analytical Chemistry, R&D Formulations, Experimental Design, Method Validations.
- Management level roles with up to 20 direct reports.
- Corrective and preventative actions to resolve both minor and major observations.
- Contract lab and contract manufacturing including stability studies.
- FDA regulated environments and offers extensive background within R&D and project management.
- MS Biochemistry, FDA compliance, HPLC, GC, UPLC, FT-IR, Wet Chemistry, dissolution.

Quality Engineer – 262586

\$75K

- Quality planning and development, new product integrations, non-confirming corrective actions, material deviations, validations, VOC quality integrations.
- Validation protocols, quality tracking systems, training, development.
- Production line quality resolution, material review boards, standard work procedures development.
- MS, BSIE, Greenbelt, ASQ-QT, Continuous Improvement, Human Factors Engineering.

Quality Engineer – 262015

\$80K

- Quality planning and development, process failure analysis, control plan development.
- Statistical Analysis, GR&R studies, reverse engineering analysis, CAPA, QMS.
- Corrective Action planning, warranty claims, scrap and defective material.
- Blackbelt, Lead Auditor, ISO

Quality Engineer – 120569

\$85K

- Supplier quality initiatives using APQP, VOC corrective actions, pre-shipment inspection process development.
- Continuous Improvement development for product quality reductions for intra company and direct customer supply.
- Program and analysis on root cause, quality improvement concerns and programs addressing concerns.
- BS, Blackbelt, ASQ – QT/QE/QA certified.

Supplier Quality Engineer – 100698

\$85K

- Onsite and test compliance, quality, performance, specifications regarding quality standards.
- Corrective action lead on supplier programs, validations, product implementation, FMEA reporting.
- Created product quality alerts, work instructions, process development and rework programs.
- BSEET, Blackbelt, DFSS, TS16949, ISO9001, FDA/GMP, GD&T, CMM, QA/IA, TQL PDRs.

Quality Engineer – 63905

\$75K

- Audit supplier quality programs proactively reporting and correcting internal/internal process quality issues.
- Develop and maintain Control plans, PFMEAs, SOP, defect metrics.
- Root cause investigation and corrective action deployment.
- BSIE, Greenbelt, CIA ISO9001 & IATF 16949.
